

NEWLY ADDED CLAIM

20. (*New*) A hologram screen comprising:

a hologram film for diffracting light projected from a projector; and
a first transparent member and a second transparent member which together
sandwich the hologram film to cover the hologram film from a front surface and a back
surface thereof;

wherein at least one of said first transparent member and second transparent
member is replaceable, said first and second transparent members being fixed to each
other by screws, each of said screws penetrating through-holes provided in both the first
and second transparent members and is threaded into a nut, thereby fixing the first and
second transparent members to each other.
